ROYLCO

We're excited to present our line of 2020 products! We've been working hard across the board, from product development to product packaging, to deliver the most exceptional educational products on the market for the best value.

Also, we've taken giant leaps forward to produce more eco-conscious packaging by reducing our single-use plastic. We've got some terrific new options for papers, toys and supplies that are both environmentally sustainable and retail friendly.

We believe these steps reflect our commitment to provide for our customers, teachers and parents around the world, the quality concepts and materials you've come to expect from Roylco.

Our Pledge to you...

For over 50 years, all Roylco products have been meticulously designed with child safety in mind, every step of the way. Once the design phase is complete, we send our products to independent third-party labs to be tested against the strictest standards of the law. As parents, we are concerned about what our children touch and the quality of the material. Safety standards are our highest priority. This is our pledge to you. We strive to create products that are environmentally friendly and made from recyclable materials whenever possible. You can be sure that every Roylco product you purchase is paraben free, BPA free, lead free, phthalates free, and age appropriate. Every package is clearly marked with any necessary safety warnings according to the International Toy Safety Requirements. We do this so you can do your best, for your children, to light the spark of creativity and inspire a lifetime of learning.

We ♥ to hear from you!

There's nothing more satisfying to us than to see our products in the hands of teachers and children. We're always amazed by your creativity! You truly bring our products to life. Please continue to share your beautiful crafts with us! You're the source of our inspiration.

And to the teachers who have reached out to us with suggestions and requests, thank you! We take pride in our ability to customize our products to help you make the most of your ideas. Feel free to reach out to us if there's something we can do to help fuel your imagination!

Try these simple steps to get the most out of your Color Diffusing creativity!

1. Create Color Diffusing art from an original drawing! Start by sketching onto the paper with a pencil.
2. Next, you'll need to prep the surface. Spray the paper lightly with a fine mist of clean water. You can use our Paint Spritzers (54466), or an empty spray bottle, such as a cosmetic or household spray bottle. Spray just enough water so that the surface of the paper has a light covering of mist. Try not to over saturate the paper with water in this step.
3. Now you're ready to add color. For best results you'll want to use liquid watercolors. These are different from normal watercolors in that they behave more like ink than paint. Add these colors to your misting spray bottle. If you're using powdered pigments, remember that a little goes a long way! Add a small amount of pigment to 2–3 oz of water and shake well. The more pigment you use the darker your colors will be. As you spray the colors onto the paper you should see the colors bleed into the paper, creating beautiful patterns!
